$60K Jobs: The UNIX Administrator

Synopsis

By following the steps outlined in this book, you can achieve a very realistic $5K per month income ($60K annual) as a UNIX Administrator. This is only a starting point, of course - it's up to you to take it further but we believe $60K is a respectable and realistic target for many people. If you're looking for a new career and have an interest in UNIX, you have to take a look at this book - filled with real life experiences and practical examples. Initially written for servicemembers who were getting out of the military, this book now has ample advice regardless of "where you're coming from".

Book Information
