Age Range: 4 - 8 years

Grade Level: 1 - 3

## Customer Reviews

Very appropriate for my first grader. Enough information along with pictures to give her a feel for the geography of the Nile river

This little book is great! Perfect for a youngster to practice their own reading skills not to mention the fact it's full of interesting facts about the Nile. The pictures are real life pictures of the Nile including one from outer space that is so amazing! Glad I bought it.

This book is small and thin, but is an excellent resource with an appropriate amount of info for new readers. At first I felt gyped when the book arrived, but it turned out to be one of my daughter's favorites!

The Nile River Book was perfect for my Pre K class and summer school class. We studied Egypt and the text and picture were very nice and simple for young readers to understand.

We are studying Egypt and the Nile River, and this is the perfect text for my Kindergarten and 1st grade readers to read information about the Nile on their own!
