Corba On The Web (Hands-on Web Development)

Synopsis

Second generations Web/CORBA technologies are paving the way for object-orientated, distributed, interoperable systems to be deployed over the Internet. This is the package that shows Web programmers and developers how to exploit these powerful new tools and get a jump on the next wave of the Web. It focuses on software -- especially Iona's OrbixWeb, the leading Web development ORB -- and how to use it. Ben-Natan also reveals how to make CORBA, Java, and JavaBeans work together, and how to construct CORBA firewalls.

Book Information

Series: Hands-on Web Development

Paperback: 432 pages

Publisher: Computing Mcgraw-Hill (February 12, 1998)

Language: English

ISBN-10: 0070067244

ISBN-13: 978-0070067240

Product Dimensions: 1.2 x 7.2 x 9.2 inches

Shipping Weight: 2 pounds

Average Customer Review: 1.0 out of 5 stars [See all reviews](#) (2 customer reviews)

Best Sellers Rank: #16,388,638 in Books (See Top 100 in Books) #81 in [Books > Computers & Technology > Networking & Cloud Computing > Networks, Protocols & APIs > CORBA](#) #6689 in [Books > Computers & Technology > Programming > Software Design, Testing & Engineering > Object-Oriented Design](#) #17031 in [Books > Computers & Technology > Web Development & Design > Web Design](#)

Customer Reviews

The book does not suite its fancy title. There is not a single concrete example which will guide you successfully for programming web components in CORBA. The CD-ROM also contains material which is available on IONA's web site. The fancy title is meant to attract readers and the book is too theoretical.

One of the worst books I've ever had the misfortune of purchasing! I wonder could I sell it over eBay?
