# Fedora Linux Servers With Systemd

Synopsis

This book is designed as a server reference for Fedora Linux with systemd. The current version covers Fedora Linux 20. Administration tools are covered as well as the underlying configuration files and system implementations. The emphasis is on what administrators will need to know to perform key networking and server tasks. Topics covered include the systemd service manager, the systemd service and target files for each server, the firewalld firewall. Key servers are examined, including Web, FTP, CUPS printing, NFS, and Samba (Windows shares). Network support servers and applications covered include the Squid proxy server, the Domain Name System (BIND 9 and BIND 10) server, and DHCP (DHCP 4 and BIND 10).

Book Information

Paperback: 504 pages

Publisher: surfing turtle press (May 6, 2014)

Customer Reviews

Getting help with each version of Fedora is very difficult. The OS changes dramatically with every release and since Version 14 has been very difficult to use. This book brings some order to the chaos. It's not the first book by the author, and his writing has evolved considerably along the way. I was able to get each of the servers up and running quickly. The web is not much help with Fedora because there are so many versions out there. One search will bring you great help for Fedora 12, but it's useless for Fedora 20. I'm giving it 4 stars because of the price. If you want to speed up your network with a local caching DNS server, a Squid Proxy Server, and protect your network with a firewall, this book will get you there. I got all of these running and more in one evening with this book. It would be nice if there was a companion book for web based applications on Fedora. I use

Mate as my desktop and had no issues. I caught a few typos but they were inconsequential.

Book is great, learned a lot about every little thing about fedora and setting up sites on a system. The packaging was ok being packaged with another book.There was just a little hit in the packaging that put a little fold in the bottom right corner about half a inch not to bad.
