Age Range: 7 - 9 years

Grade Level: 2 - 4

Customer Reviews

Loved the clever and detailed illustrations, it was a simple to follow timeline starting at 1 million bc - 2011, covered several subjects and men and women inventors. Many of the inventions were by Americans, just noted. For my older kids it did open a door of conversation, they wanted to know why inventions seem to lessen on the timeline as we hit the latter part of the 20th century :(Loved the book, well put together!

This book was more juvenile than I expected. I had intended to give it as a gift to a 13 year old, but upon receiving it realized that it was more suited to a child of five or six.

Nice little fact book. You can read it all in five minutes of browsing through illustrated narrative of facts of history. An easy read and quick children's educational tool. Also a quick reference check

handbook. Some facts were less explicit, for example who were behind the Apple company was not given. This must have been a serious omission by the authors.
