# Understanding And Deploying LDAP Directory Services (MacMillan Network Architecture & Development)

Synopsis

This comprehensive tutorial provides the reader with a thorough treatment of LDAP directory services. Minimal knowledge of general networking and administration is assumed, making the material accessible to intermediate and advanced readers alike. De signed to meet multiple needs, the first part of the book presents a general overview of the subject matter, and the next three sections cover detailed instructions for design, deployment, and integration of directory services. The text is full of practical implementation advice and real-world deployment examples to help the reader choose the path that makes the most sense for the specific organization.

Background:LDAP (Lightweight Directory Access Protocol) is a software protocol that enables locating organizations, individuals, and other resources such as files and devices in a network, whether it is a public Internet or a corporate Intranet.As LDAP adoption and deployment is increasing, the expanded second edition of "Understanding and Deploying LDAP Directory Services" is published with more materials from the authors on the protocol and how to apply it effectively in different network environments.Book Organization:The book consists of twenty-six chapters divided into six major parts:- Directory services overview and history- Designing your directory service- Deploying your directory service- Maintaining your directory service- Leveraging your directory service- Case studiesThe book begins by defining directory services and what they can offer for an organization then gets into the specifics of how LDAP organizes directories and

handles queries with coverage of LDAPv3 extensions and the Netscape Directory Server.The books then moves on to explore a wide range of topics such as designing directory services, naming, topology, replication, privacy, security deploying, directory services, implementation pitfalls, cost analysis, maintaining directory services, troubleshooting, and creating and enabling directory-serviceapplications.The book offers help and advice for comparing "LDAP-compliant" products on features, management tools, reliability, performance, scalability, security, standards conformance, interoperability, cost, and other criteria. Then, having chosen a vendor, you'll walk through piloting your applicationand testing it for performance, scalability, and reliability.
