## Customer Reviews

My son loves these quick study/class aids. I like that they are pre-punched and have a coating for them. My son likes them because they are very handy and he can usually find items he is looking for without having to flip through a text book.

This item arrived as advertised and on time. (no surprise there) It was in great condition and even already had the holes punched in it so I could just slip it in my 3 ring binder and go. I am hoping that it will be of great help to me in studying for my Geology class.

The science of earth. Timeless, and a perennial favorite in high school classrooms. I truly enjoyed receiving this used copy and saving myself the 100+ dollars it would have cost to replace the one my daughter lost. And she is happy because I did not have to extract the higher price from her worldly possessions.

It is a great quick help reference right in front of you. Sure beats a book. Has helped me greatly in

earth science
