# Rocks And Minerals Sticker Book

## Synopsis

A colorful and informative introduction to some of the most common rocks and minerals, packed with amazing facts, fun puzzles and games, and more than 100 reusable stickers! Ideal for younger readers, this beautiful sticker book showcases "stones" from the tiger's eye and leopard skin stone to rubies, sapphires, diamonds, emeralds, and many more. The stickers are accompanied by fun learning pages with information on how rocks and minerals form, what they are made into, and how to identify them, as well as lots of bite-size facts about their size, color, and origin. Readers can put their knowledge to the test with some puzzles and games, including a coloring activity and rocky maze, and create their own scenes by adding stickers to a colorful double page landscape spread. The book is fully checked and approved by the department of zoology at the Natural History Museum, London. The museum's world-class collections of minerals, ores, meteorites, rocks, and soils include specimens from Mars and the moon, and from the earliest bodies that helped to form the solar system 4.56 billion years ago.

## Book Information

Paperback: 14 pages

Publisher: Natural History Museum, London; Stk edition (December 1, 2013)

Language: English

ISBN-10: 0565093002

ISBN-13: 978-0565093006

Product Dimensions: 8.3 x 0.2 x 10.8 inches

Shipping Weight: 4.2 ounces (View shipping rates and policies)

Average Customer Review: 4.5 out of 5 stars - See all reviews (4 customer reviews)

Age Range: 4 - 6 years

Grade Level: Preschool - 1

## Customer Reviews

Stickers are much larger than quarters and have nice bright colors. Mineral name isn't printed on sticker itself so if you peel off and stick outside book ... won't have name attached. Haven't tried yet so can't comment on adhesive power. Cover arrived creased

Plenty of brightly colored stickers make this a fun learning experience for a child who wants to know more about rocks and minerals. The basic activity focuses on matching the reusable stickers with the information sections of the book. There's also plenty of factual material on these pages to whet the reader's interest and pique his or her curiosity so that further study of the topic follows. Besides being used in the book as intended, the stickers might come in very handy for illustrating a report on rocks and minerals. Don't be afraid to think outside the box. Perhaps you can devise a board game or flash cards using the stickers. If you are a teacher or home schooling your child get creative and use this book as part of a unit on geology or earth science! Just remember that the stickers do pose a choking hazard so keep them away from very young children. This book was supplied by the publisher.

GREAT CLASSROOM TOOL!

fun! nice stickers
