Grade Level: 2 - 3

Customer Reviews

This is a great book. I have two young children and bought this book to help us learn about the different kinds of animals. The book has bright, colorful pictures that are appealing to kids and is very informative. It is simple enough not to overburden young children with info they aren't ready for but yet teaches them lots of awesome things about animals. I definitely recommend this book!

Finally found the book that is the perfect addition to our animal unit. It has photos and text that captures the students interest.

Good review of classification with great pictures!
